4)Nisarg Shah (191310132132)

5)Faizal Polara (191310132114)

Electronics Shop Management System helps shop owner to manage record keeping of his shop. In traditional paper-based system shop owner have to keeps record on paper. It is difficult to manage accounting on page especially if the data to be managed is large. Electronics Shop Management System converts all these into digital form. This system is developed specifically to ease the department of sale and purchase. This system will reduce the manual operation required to maintain all the records of sales and purchase. This system is able to manage data of all types of stock i.e. Television, Computers, Mobile Phones, Refrigerator, Air-conditioner, etc as well as the manage data regarding employees and customer. In this system the shop owner can easily see and change the data with minimum effort. He can manage Employee details, Customer details, Product details, transaction details, Order details, etc of all the branches of his shop in different areas very easily and efficiently which would not have been possible the traditional way.
